CUSTOM HOMES VIENNA: open doors at some of the most exclusive real estates in town in cooperation with DESIGN DISTRICT 1010

We are delighted to announce that this fall for the very first time, the exhibition of classy interior and luxury living will take place at the Vienna Hofburg. From the 6th till the 8th of October international and national high-end brands from the fields of interior design, art, HiFi and Engineering will exhibit their goods, spanning across more than 5.000 square meters of inspiring exhibition space.

CUSTOM HOMES VIENNA aims to introduce high-class real estates in the city centre of Vienna and enable our guests to take a closer look at some of them. The focus will be on customized living: the perfect symbiosis of exclusivity, flexibility and individuality plays a major role. Real Estate that fits all these descriptions will be showcased on the exhibition. There will be a shuttle service available for all those visitors wishing to get an insight into respective real estates.

Take the chance to experience the diversity of first-class projects in the unique ambience of the Vienna Hofburg and contemplate with real estate developers and architects about your personal scope of design.

OTTO IMMOBILIEN, one of our partners with long-time experience in the field of real estate investments is pleased to answer all your questions about the real estate market in Vienna including consulting service.

"When it comes to premium apartments located in the first district of Vienna, Otto Immobilien is the first choice. Our long-lasting experience, detailed know-how of brands plus national and international marketing opportunities is valued by both buyer and seller. This is why we name Otto Immobilien the "local hero" of this event and are happy to get into one-to-one conversations with clients.", says Mag. Richard Buxbaum, Chief Attorney and head of the Residential real estate branch.

Simultaneously with DESIGN DISTRICT 1010, Otto Immobilien will introduce its current "residential flats atlas" of Vienna's first district. All relevant criteria about city-centred apartments from the year 2008 and onwards are included in a transparent and coherent way: price trend, total valued stock, number of sales and also origins of vendees.
